

BOOK CLUB KITS

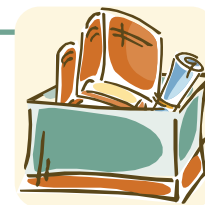

Everything a you need to run a successful book club — conveniently packed in one box.

Book club facilitators, are you tired of doing all the research and tracking down enough copies of a book for your club? The Poudre River Public Library District has you covered.

Book Club Kits are created with the book club reader in mind; therefore, books are selected that are provocative enough to prompt discussion, create dialogue among members, and can be fiction or non-fiction.

One member from your group checks out the convenient plastic tub for 6 weeks and is responsible for its contents.

If a kit is currently checked out, you may place it on hold.

EACH KIT HOLDS:

- **10 books**
- **A notebook that contains author biographical information**
- **Reviews and critiques**
- **Discussion questions**
- **Supplemental information that is relevant to the particular title.**

KIT TITLES ARE SELECTED WITH THE FOLLOWING CRITERIA:

- Strong themes, complex characters, interesting relationships, and are not formulaic.
- Characters are faced with difficult choices.
- Themes involve a strong moral or ethical conflict.
- Are often controversial books. Some of the best discussions arise when someone dislikes the book.
- Presents the author's view of important truths and sometimes sends a message to the reader.
- Are entertaining and educational.
- Have universal or lasting application and deemed to have literary merit.
- Are prone to different interpretations by a variety of readers.
- Can be read more than once, and each time the reader learns something new.

GO ONLINE FOR A COMPLETE LISTING OF CURRENT BOOK CLUB KITS!

1. Go to www.PoudreLibraries.org
2. Do a catalog search for "Kit".
3. From the page that comes up - first go to the facets/limiters on the left side column.
4. Under "format" select "more" and then "kits".
5. Move down the list to "collections" and select "adult" at this point all of the 95+ book club kits will display.
6. If you want to see what is available at each library move back up the list to "Branches" and select the branch you wish to view.
